DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method of making a semiconductor device, classified in class 438, subclass 612.
 - II. Claims 10-26, drawn to a semiconductor device, classified in class 257, subclass 779.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as, the stress relief layer can be formed of resin instead of polymer.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. **In addition, if the method is elected, Applicant is further required to elect a species of:**

Species 1 drawn to a process of forming a substantially continuous stress relief layer film between the electrical first bump and an electrical second bump, which claims 1-4 and 8-9 read on.

Species 2 drawn to a process of forming a substantially continuous stress relief layer film between the electrical first bump and an electrical second bump in excess of two, which claims 1-3, 5 and 8-9 read on.

Species 3 drawn to a process of dispensing the polymer stress relief layer with ejecting a substantially continuous polymer mass upon the lower surface that includes a ball grid array, which claims 1-3, 6 and 8-9 read on.

Species 4 drawn to a process of dispensing the polymer stress relief layer with ejecting a discrete series of quanta of polymer mass upon the lower surface that includes a ball grid array, which claims 1-3, 7 and 8-9 read on.

5. In addition, if the device is elected, Applicant is further required to elect a species of:

Species 1 drawn to an article, which claims 10-17 read on.

Species 2 drawn to a package, which claims 18-23 read on.

Species 3 drawn to a computing system, which claims 24-26 read on.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 2813

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
